Platform Edition

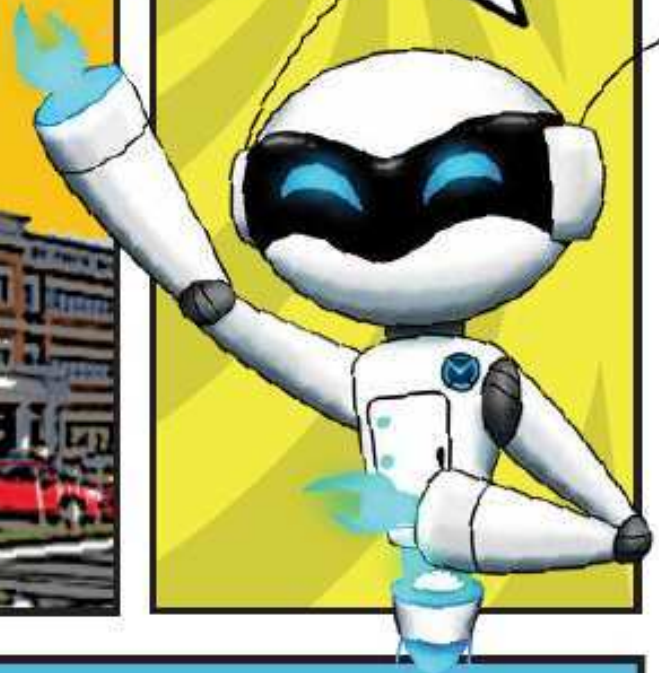

OUR ORIGINS STORY...

OpenMetal was launched as an independent brand in February 2022. Prior to that, OpenMetal was incubated under InMotion Hosting as Flex Metal Cloud from 2019-2022.

InMotion Hosting, founded in 2001, has helped hundreds of thousands of entrepreneurs, startups, and businesses of all sizes succeed online through reliable website solutions and professional services supported by extraordinary customer support.

We had long used open source as a foundation. As we grew, we increasingly used larger and more complex open source systems. That was when we recognized that these systems are not easily accessible to everyone.

OUR MISSION STATEMENT!!

We believe that highly complex open source systems must become more accessible to preserve the heart of open source.

Our mission is to simplify the adoption of open source and empower individuals - by themselves or within teams - to meaningfully contribute to the larger community, fostering innovation that benefits all.

THE RESULT??

A completely new IaaS that comes with a completely new way of empowering your team. OpenMetal IaaS platform supplies the automation of pre-selected clusters of hardware that enable the delivery of on-demand, highly complex open source software.

INTRODUCING OPENMETAL'S FLAGSHIP DISRUPTOR

NO BUILDING. NO WAITING. NO HARDWARE MANAGEMENT.

Get a Private Cloud Core (PCC), a hyper-converged set of 3 servers with your choice of hardware type, configured and optimized with OpenStack and Ceph, fully customizable and production-ready in 45 seconds.

CLOUD ACCESS

GET THE BENEFITS OF PRIVATE CLOUD:

- A security first, private cloud model
- Go faster with a cloud matched to your workload
- Built-in rich set of cloud features plus free add-ons
- Data stored where you want and how you want

WHILE REDUCING YOUR INFRASTRUCTURE COSTS:

- Set your hardware budget, no surprise bills
- Fixed bandwidth costs for the majority of use cases
- Low bandwidth costs for all high-volume transfers
- No license fees on VMs or other cloud resources

OUR NOT-SO SECRET SUPPORT POWERS!

- Hosted in Tier III Data Centers
- In-House Support Staff
- 99.96% Power/Network Uptimes
- Access to Engineering Resources

Connect Directly
with the OpenMetal
Team via Slack
and/or other tools.

POWER UP WITH BARE METAL

Leverage both the power of the Cloud and the power of Bare Metal. Get direct access to your server so that you can get the most performance out of your applications.

OPENMETAL DELIVERS THE POWER OF OPENSTACK AND PRIVATE CLOUD...ON-DEMAND!

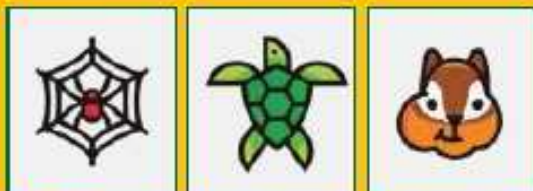

Get a Powerful Set of OpenStack Services Enabled at Deployment.

OCTAVIA CEILOMETER WATCHER

"OpenMetal Cloud provides on-demand private infrastructure, which brings cloud fundamentals like elasticity and usage billing to the cloud deployment itself. It's awesome to see OpenMetal's latest product use OpenStack to combine the benefits of public cloud and managed private cloud, powered by open infrastructure."

Thierry Carrez, VP of Engineering
Open Infrastructure Foundation

Try It For Yourself REQUEST A FREE CLOUD TRIAL

Private cloud cores are free of charge for trials and some other non-production uses.

- Get your workload optimized before having to pay
- Great for training and getting familiar with OpenStack and Ceph
- Test new functionality or management approaches
- Conduct performance tests for benchmarking
- Create your automation (like Terraform Plans) in a completely safe environment
- Multiple trials can be run each month, timer starts at deployment of cloud

IT'S EASY!!!

1. Scan the QR code and click on "Login" to "create an Openmetal Central account."
2. In OpenMetal Central, click on "Launch Cloud Trial" button.
3. Choose an Individual Trial (for 8 to 32 hours) or Organizational Trial (for up to 30 days).
